Close Contact to Positive COVID-19 Case

Vaccinated close contact

- No quarantine needed if asymptomatic. Monitor symptoms for 14 days after exposure. (Refer to CDPH Fully Vaccinated People Guidance for more information.)
- If any symptoms develop during this 14-day period, isolate, get tested, and contact healthcare provider with any questions regarding care.

Unvaccinated close contact

- Case and close contact both wearing a mask
  - Asymptomatic close contact
    - Eligible for modified 10-day quarantine to attend school but quarantine from extracurricular activities if:
      1. Remain asymptomatic
      2. Continue to mask, as required
      3. Undergo at least twice weekly testing during 10 day quarantine
      4. Continue to quarantine from all extracurriculars and activities in community.
  - Symptomatic close contact (if symptoms develop w/in 14 days of exposure)
    - Isolate, get tested, and contact healthcare provider with any questions regarding care.
    - If still asymptomatic, quarantine may end:
      1. After day 10 from last date of exposure without testing
      2. After day 7 if a diagnostic specimen is collected after Day 5 from the date of last exposure and tests negative.

- Case and/or close contact NOT wearing a mask
  - Asymptomatic close contact
  - Symptomatic close contact (if symptoms develop w/in 14 days of exposure)

FOR ALL CLOSE CONTACTS:
If quarantine discontinues before 14 days following last known exposure, asymptomatic close contacts must:

i. Continue daily self-monitoring for symptoms through Day 14 from last known exposure; AND

ii. Follow all recommended non-pharmaceutical interventions (e.g., wearing a mask when around others, hand washing, avoiding crowds) through Day 14 from last known exposure.
