Please update your codes for WEE courses to the following numbers:

- Career Technical WEE: 7004 → 9502
- Exploratory WEE: 7002 → 9500
- General WEE: 7003 → 9501

These changes are due to the difference in credentialing for WEE vs. CTE pathway courses. CTE pathway courses require designated subject credentials while WEE courses allow for various non-emergency teaching credentials which provides flexibility for districts. CALPADS will be checking the credentials of teachers assigned to course codes so, to avoid mis-assignment flags for WEE teachers without designated subject credentials, WEE was assigned these new codes. Also, WEE had been assigned to a category of courses known as Multi Sector alongside other courses that were not WEE but had similar titles which had a high potential for confusing data entry.
